

BitNile Holdings Issues July Bitcoin Production and Mining Operation Report

August 3, 2022

- **59.9 Bitcoin Mined in July 2022**
- **Company Now Holds Approximately 200 Bitcoin With No Plans to Sell**

LAS VEGAS--(BUSINESS WIRE)--Aug. 3, 2022-- [BitNile Holdings, Inc.](#) (NYSE American: NILE), a diversified holding company (“**BitNile**” or the “**Company**”) today published an unaudited update on Bitcoin production and miner deliveries. The number of miners and production capacity metrics within this press release represent the S19j Pro Antminers at the Michigan data center. BitNile’s Bitcoin mining production is currently operating at an estimated annualized run rate of 719 Bitcoin based on current market conditions, including a mining difficulty of 27.69 trillion.

This press release features multimedia. View the full release here: <https://www.businesswire.com/news/home/20220803005443/en/>

BitNile has increased its miner count to 11,949 S19j Pro Antminers in its possession and once installed will generate a combined processing power of approximately 1.19 exahashes per second, the computational power that is being used to mine Bitcoin. During the month of July 2022, BitNile self-mined 59.9 Bitcoin. To date, BitNile has mined a total of 316.4 Bitcoin. As of July 31, 2022, BitNile held approximately 200 Bitcoin and currently has no plans to sell.

“July proved to be another successful month as we continue to make measurable progress in scaling our Michigan data center,” said Milton “Todd” Ault, III, the Company’s Executive Chairman. “I’m proud of what the team has been able to accomplish, despite a volatile Bitcoin market, and am thrilled with our growing Bitcoin reserves.”

As previously disclosed, BitNile has entered into purchase agreements with Bitmain Technologies Limited (“**Bitmain**”) for a total of 20,600 Bitcoin miners, including 4,600 environmentally friendly S19 XP Antminers that feature a processing power of 140 terahashes per second (“**TH/s**”) and 16,000 S19j Pro Antminers that feature a processing power of 100 TH/s.

BitNile expects to receive all of the 20,600 miners by the end of 2022. Once fully deployed and operational, BitNile is expected to achieve mining production capacity of approximately 2.24 exahashes per second.

The Company notes that all estimates and other projections are subject to the actual delivery and installation of Bitcoin miners, the volatility in Bitcoin market price, the fluctuation in the mining difficulty level, and other factors that may impact the results of production or operations.

For more information on BitNile and its subsidiaries, BitNile recommends that stockholders, investors, and any other interested parties read BitNile’s public filings and press releases available under the Investor Relations section at www.BitNile.com or available at www.sec.gov.
